

Don't think in silos (2018 version)

There is water all around us
Making sure we stay alive
But everyone needs to conserve it
Or lots of things may not survive

Chorus

Don't think in silos, got to put them all together
Use systems thinking, if we get our brains in gear
We'll see the impact that all things have on each other
Let's join the dots... see the big picture appear

If we all try to recycle
Cut down on all the things we waste
Could things be used by other people?
Don't throw old stuff out in such haste

Chorus

Aim to be energy efficient
Turn off the lights, TV and games
Save money and save our resources
It will be everybody's gain

Chorus

Rap Section (x 2)

Don't think in silos
Put them together now
Mix them up
Come on let me show you how
Our social handprint span wide
While our Eco footprint gets smaller in size

Chorus x 2
