

Energy

There's this thing called energy
It's vital for you and me
Energy's what makes us walk
Run or jump, sing or talk

Chorus

Energy is everywhere
On the ground or in the air
Helping aeroplanes to fly
Keeping them in the sky

Chorus

Wind that's blowing all around
Keeps those turbines turning round
Converting energy for free
Into electricity

Chorus

Things vibrate, air starts to move
Particles all bump and groove
Sound waves are formed, doesn't take long
That's how you hear this song

Chorus

Final Chorus then last line:

(All) I don't know where we would be, without energy

Chorus

(Group 1) Energy is all around us

(Group 2) All the time, yes it surrounds us

(Group 1) Keeps us warm, helps us survive

(Group 2) Makes our planet stay alive

(Group 1) Potential and kinetic

(Group 2) Stored or moving, slow or quick

(All) I don't know where we would be

Without energy

Final Chorus

(Group 1) Energy is all around us

(Group 2) 'Radiant'

(Group 2) All the time, yes it surrounds us

(Group 1) 'Mechanical'

(Group 1) Keeps us warm, helps us survive

(Group 2) 'Thermal'

(Group 2) Makes our planet stay alive

(Group 1) 'Nuclear'

(Group 1) Potential and kinetic

(Group 2) 'Magnetic'

(Group 2) Stored or moving, slow or quick

(Group 1) 'Chemical'
