

Voyager

Come with me let's take a trip
On this Intrepid class Star Fleet ship
With a new warp core
For the long term explore
We will move with power and speed
The sleek design is what we need
To reach almost warp ten
And then smoothly go slower once again

Chorus

Voyager, heading across the stars
Travelling way past Jupiter and Mars
On through the Milky Way
Voyager, go deeper in outer space
Will we see beings of an unknown race?
Their planet and hear what they have to say

See the bridge, the place of power
Manned by someone every hour
Where Janeway stands with pride
The crew are at her side
Then we'll ride the turbo lift
Where passage to each place is swift
Past many different floors
With Sick Bay, Engineering and much more

Chorus

Try how a new world would feel
On a holodeck it all seems real
Create your own design
Maybe go back in time
You could make a friend or two
A boat or car it's up to you
Cool technology
Will replicate all your ideas for free

Chorus
