

# Insects Rock!

## Chorus

We're lacewings, stick insects and bees  
Find us in gardens, woodlands, even trees  
Got antennae on our heads  
And our 3 pairs of legs  
Help us get around with ease

We're green in colour, such delicate things  
With clear, lace like membranous wings  
Three body parts like most insects  
Your free solution to small garden pests

## Chorus

We're Goliaths, and we're pretty large  
And also good at camouflage  
With yellow patches, some on our head  
Green bodies match the gum tree leaves that we are fed

## Chorus

We're pollinators moving round several flowers  
Gathering nectar in our working hours  
Our wings all four attached in pairs  
Vibrate and make a buzz as we fly through the air

## Chorus

Now listen, I'm the queen bee  
The colony would suffer without me  
I keep my workers feeling well  
And they just love the way I smell!

spoken by Queen Bee only

## Chorus

Abdomen, thorax and head  
Compound eyes and jointed legs  
To lots of different places, we'll flock  
We're insects and frankly, we rock!
